

Choices

All thorough out life we make some screwed up choices.
They can cause some ripple effects in our lives.
Choices keep us constantly changing direction,
And does things to others emotions and affections.
We might feel good about what we do,
for when it happens it's not me but it's you.
When our lives do not abound in love,
That means our thoughts are not from above.

Choices determine who we are and what we become,
which often makes us look dumb.
We're urged to make excellent choices,
the kind which emanate from your heart.
Making them pure means they will never part.

Have we always understood what is best?
No, because it's about choices and none of the rest.
Being sincere in every thought and deed,
often brings us into either want or need.
All this is done by request in joy.
In life we make decisions like a little girl or boy.
Often our choices take us places we don't want to go.
Make them proper and they'll always show,
what's the correct way for us to be
Then we won't be so blind or often hard to see
